TOSHIBA

Imaging Accessories - Volume 4

WWW.CIVCO.COM

CIVCO's Needle Guidance Systems utilize a **TWO-PART SYSTEM** consisting of a reusable biopsy bracket and a disposable snap-on needle guide. The disposable needle guides snap onto the biopsy bracket, providing a fixed path for visualizing ultrasound-guided instrument placement procedures. Applications include tissue biopsy, fluid aspirations and catheter placement. **SINGLE-ANGLE BRACKETS** offer imaging professionals a fixed angle needle path during puncture procedures. **MULTI-ANGLE BRACKETS** offer professionals different angles for needle placement. Once the desired angle has been selected, a stainless steel pin locks the angle securely into position. The pin is removable from the bracket for easy reprocessing between patients. Brackets should be cleaned and disinfected according to your CIVCO User's Guide.

ULTRA-PRO II™ REUSABLE STARTER KITS

Each starter kit contains 5 sterile procedure kits including: needle guide, telescopically-folded CIV-Flex™ transducer cover, gel packet and colored elastic bands. U.S. Patent No. 5,941,889.

ULTRA-PRO II™ DISPOSABLE REPLACEMENT KITS

ENHANCED PRODUCT! The Ultra-Pro II needle guide now incorporates more flexibility and advanced features to increase productivity during ultrasound-guided procedures. The needle guide directs instruments according to on-screen software guidelines. The Ultra-Pro II features a larger tab for improved quick-release function, allowing easy detachment of the needle from the transducer. Easy-to-read gauge sizes on the inserts makes it simple to identify and alter gauge sizes in a darkened ultrasound suite. The guide now features a larger funnel for instrument insertion and will accept a full range of sizes, including: 8.5FR, 14-23GA (19GA not available). U.S. Patents No. 5,941,889.

ULTRA-PRO 3™ DISPOSABLE REPLACEMENT KITS

The design of the Ultra-Pro 3 offers all the advantages of needle guidance while maintaining the tactile feel of the “freehand” technique. The guide features zero needle resistance offering smooth movement and navigation during puncture procedures. The needle guide includes a quick-release feature for easy detachment of the needle from the transducer. The guide includes two disposable inserts: a large gauge insert offering 11, 12, 13, 14 and 15 gauge selection; a small gauge insert offering 16, 17, 18, 20 and 22 gauge selection (19, 21 GA not available). This guide is designed for use with Ultra-Pro II or Ultra-Pro transducer brackets. U.S Patent No. 5,941,889.

LATEX-FREE CIV-FLEX™ COVERS

NEW Extended Length Covers for Added Protection!

Recommended for over a decade as the latex-free cover of choice, CIV-Flex covers are now available in extended lengths of 36 and 58 inches. These extended length covers offer additional sterile protection when performing routine puncture and drainage procedures. The improved telescopic-fold allows for easy application of gel, as well as easy application of the cover onto the transducer. Sterile general purpose procedure kits include transducer cover, gel packet and colored elastic bands. Select covers offer a three-dimensional “box end.”

LATEX-FREE POLYETHYLENE COVERS

NEW Extended Length Covers for Added Protection!

Economically-priced polyethylene covers are commonly used in sterile scanning and puncture procedures. Polyethylene covers are a safe means for reducing cross-contamination. Polyethylene covers are packaged with sterile gel packet and elastic bands. Select covers offer a three-dimensional "box end."

REF. #	Product Description	Qty.
610-013	Sterile 5 x 61cm (2" x 24") flat-folded polyethylene cover	24
610-015	Sterile 10.2 x 61cm (4" x 24") flat-folded polyethylene cover (3D)	24

610-022	Sterile 22.9 x 61cm (9" x 24") flat-folded polyethylene cover	24

LATEX COVERS

Latex covers are rolled for easy application to a variety of curved array transducers. An extended length in the larger sizes of latex offers additional sterile coverage during general puncture and drainage procedures. Latex covers are packaged with sterile gel packet and colored elastic bands.

REF. #	Product Description	Qty.
610-042	Sterile 4 x 30cm (1.6" x 11.8") rolled latex cover	24
610-043	Sterile 5 x 30cm (2" x 11.8") rolled latex cover	24
610-044	Sterile 8 x 45cm (3.2" x 18") rolled latex cover	24
610-046	Sterile 10 x 45cm (3.9" x 18") rolled latex cover	24

BULK PACKAGED LATEX-FREE CIV-FLEX™ COVERS

Bulk packaged in an easy-to-use box, these non-sterile CIV-Flex covers offer added protection against cross-contamination between routine scanning procedures. Non-sterile colored elastic bands are included. These covers offer a three-dimensional "box end."

REF. #	Product Description	Qty.
610-362	Non-sterile 14 x 61cm (5.5" x 24") flat-folded CIV-Flex cover (3D)	50
610-903	Non-sterile 14 x 30cm (5.5" x 11.8") flat-folded CIV-Flex cover (3D)	50

LATEX-FREE LAPAROSCOPIC COVER

This form-fitting tipped transducer cover is designed to fit easily onto standard 10mm laparoscopic transducers (requires 12mm trocar). Surgical lubricant is provided for easy application of the form-fitting tip onto the transducer. Available telescopically-folded, the cover extends eight feet up the length of the transducer cord, providing a sterile environment for procedures. Covers are individually packaged with surgical lubricant and probe clips.

REF. #	Product Description	Qty.
610-941	Sterile 15.2 x 244cm (6" x 96") poly telescopically-folded cover with attached form-fitting latex-free tip with clips	12

LATEX-FREE INTRAOPERATIVE CORD COVER & SYSTEM DRAPE

Cord covers and system drapes provide a wider sterile field during ultrasound procedures in the operating room or surgical suite. Probe clips are included with all cord covers. Adhesive tape is included with each system drape.

REF. #	Product Description	Qty.
610-024	Sterile 7.6 x 244cm (3" x 96") polyethylene cord cover	24
610-025	Sterile 76 x 76cm (30" x 30") polyethylene system drape	24
610-1037	Sterile 50.8 x 71.1cm (20" x 28") polyethylene system drape	24

LATEX-FREE SURGI™ INTRAOPERATIVE COVERS

The Surgi is a specially designed polyethylene transducer cover accordion-folded for easy application to transducers in a sterile environment. Providing distortion-free scanning, the Surgi extends up the length of the transducer cord, allowing up to 2.4 meters (eight feet) of sterile protection during ultrasound procedures in the operating room or surgical suite. Select covers include sterile gel packets and bands. The Surgi also is available flat-folded.

REF. #	Product Description	Qty.
610-023	Sterile 15.2 tapered to 7.6 x 244cm (6" tapered to 3" x 96") accordion-folded cover (no gel)	12
610-367	Sterile 15.2 tapered to 7.6 x 244cm (6" tapered to 3" x 96") accordion-folded cover	12
610-217	Sterile 15.2 tapered to 7.6 x 244cm (6" tapered to 3" x 96") flat-folded cover	24

LATEX-FREE SURGI-TIP™ INTRAOPERATIVE COVERS

The Surgi-Tip family of intraoperative covers offers a snug fit to small footprint intraoperative transducers. Available with latex-free NeoGuard tips, the covers are accordion-folded for easy application in a sterile environment. Surgi-Tip covers provide extended sterile coverage for your ultrasound transducer and cord. Covers include sterile gel packet, probe clips and elastic bands.

REF. #	Product Description	Qty.
610-657	Sterile 15.2 x 244cm (6" x 96") poly accordion-folded cover with attached 3cm (1.2") latex NeoGuard tip with clips	12
610-1072	Sterile 15.2 x 244cm (6" x 96") poly accordion-folded cover with attached 3cm (1.2") latex-free NeoGuard tip with clips	12
610-833	Sterile 15.2 x 244cm (6" x 96") poly telescopically-folded cover with attached 3cm (1.2") latex-free tip NeoGuard with clips	12
610-834	Sterile 20.3 x 244cm (8" x 96") poly telescopically-folded cover with attached 6cm (2.4") latex-free NeoGuard tip with clips	12

LATEX-FREE SURGI-BOOT™ INTRAOPERATIVE COVERS

The Surgi-Boot intraoperative transducer cover provides an extended field of sterile protection against cross-contamination during ultrasound-guided procedures. The form-fitting tip provides a snug fit to small footprint transducers. Available with latex and latex-free tips, Surgi-Boot covers are individually packaged with sterile gel packet and colored elastic bands.

REF. #	Product Description	Qty.
610-797	Sterile 15.2 x 244cm (6" x 96") poly telescopically-folded cover with attached form-fitting latex-free NeoGuard tip	12

PYROGEN-FREE INTRAOPERATIVE TRANSDUCER COVER

NEW! This new intraoperative cover provides a sterile, pyrogen-free barrier for procedures when an ultrasound transducer comes in contact with intracranial tissue. Current protocols require the use of a pyrogen-free cover, protecting against cross-contamination and preventing transducer contact with patients suffering from Creutzfeldt-Jakob (CJD) disease.¹ Latex-free, CIV-Flex™ covers include sterile gel packet and colored elastic bands.

REF. #	Product Description	Qty.
610-956	Sterile pyrogen-free 7.6 tapered to 4.1 x 147cm (3" tapered to 1.6" x 58") telescopically-folded CIV-Flex cover	24

Visit www.civco.com for photos, pricing and product spec sheets.

DISPOSABLE NEEDLE GUIDES

- Reduces technique variability, reducing procedure time
- Contoured design for patient comfort
- Disposable design reduces risks of cross-contamination
- Packaged with cover, gel and bands to increase efficiencies

NOTE: The reusable bracket is packaged non-sterile and should be cleaned and maintained according to your system manual's cleaning instructions.

LATEX-FREE NEOGUARD™ COVERS

NeoGuard is a rolled, latex-free material specially designed for ultrasound use. Recommended for patients and professionals with latex protein sensitivities, these high-quality covers are available for popular endocavity transducers. Covers include colored elastic bands. Sterile gel packets available separately.

REF. #	Product Description	Qty.
610-843	Sterile 2.6 x 30cm (1" x 11.8") rolled NeoGuard cover	24
610-1038	Sterile 2.6 x 30cm (1" x 11.8") rolled NeoGuard cover	50
610-836	Non-sterile 2.6 x 30cm (1" x 11.8") rolled NeoGuard cover	24
610-1039	Non-sterile 2.6 x 30cm (1" x 11.8") rolled NeoGuard cover	50
610-844	Sterile 4 x 30cm (1.6" x 11.8") rolled NeoGuard cover	24
610-838	Non-sterile 4 x 30cm (1.6" x 11.8") rolled NeoGuard cover	24

LATEX-FREE CIV-FLEX™ COVERS

Especially popular for OB/GYN scanning procedures, CIV-Flex is a soft, pliable material comfortable for patients. The durable CIV-Flex material is acoustically transparent, offering distortion-free imaging. Designed specifically for ultrasound use, CIV-Flex slides easily over transducers and is a recommended alternative for latex-sensitive patients and professionals. Sterile cover kits include gel packet and colored elastic bands.

REF. #	Product Description	Qty.
610-006	Sterile 11.9 tapered to 3.8 x 61cm (4.7" tapered to 1.5" x 24") flat-folded CIV-Flex cover	24
610-007	Non-sterile 11.9 tapered to 3.8 x 61cm (4.7" tapered to 1.5" x 24") flat-folded CIV-Flex cover (no gel)	24

ECLIPSE® COVERS

The Eclipse transducer cover is a pre-gelled, latex-free endocavity transducer cover. The cover is made of a pliable, polyethylene material. Use of the cover reduces the concerns of cross-contamination and protects the transducer during ultrasound procedures. Each non-sterile cover is pre-gelled with Aquasonic® 100 transmission gel and is individually packaged.

REF. #	Product Description	Qty.
610-792	Non-sterile 6.3 tapered to 4.6 x 24.1cm (2.5" tapered to 1.8" x 9.5") polyethylene cover with gel	100

LATEX PROCOVERS™

These high-quality, custom-sized PROcovers provide a defense against cross-contamination and protect endocavity transducers. All covers include colored elastic bands.

REF. #	Product Description	Qty.
610-075	Sterile 2 x 20cm (.8" x 7.9") rolled latex cover	24
610-039	Non-sterile 2 x 20cm (.8" x 7.9") rolled latex cover	24

610-041	Non-sterile 4 x 30cm (1.6" x 11.8") rolled latex cover	24

TAPERED LATEX COVERS

Conveniently packaged in individual perforated packets, this new tapered cover protects against cross-contamination. The tapered cover provides a form-fitting tip while offering easy application to larger handled transducers. Colored elastic bands are included.

REF. #	Product Description	Qty.
610-985	Sterile 3.2 tapered to 1.9 x 32cm (1.3" tapered to .75" x 12.6") latex cover	24
08990426	Non-sterile 3.2 tapered to 1.9 x 32cm (1.3" tapered to .75" x 12.6") latex cover with polyethylene cord cover, gel and elastic bands	10
610-795	Non-sterile 3.2 tapered to 1.9 x 32cm (1.3" tapered to .75" x 12.6") latex cover	24
08990418	Non-sterile 3.2 tapered to 1.9 x 32cm (1.3" tapered to .75" x 12.6") latex cover	100

3.5 x 20CM LATEX COVERS

Conveniently packaged in individually perforated packets, this looser fitting rolled latex cover provides protection from cross-contamination in all types of endocavity applications. Colored elastic bands are included with each cover.

REF. #	Product Description	Qty.
610-214	Sterile 3.5 x 20cm (1.4" x 7.9") rolled latex cover	50
610-011	Non-sterile 3.5 x 20cm (1.4" x 7.9") rolled latex cover	24
610-010	Non-sterile 3.5 x 20cm (1.4" x 7.9") rolled latex cover	50

3.5 x 20CM BULK PACKAGED LATEX COVERS

These cost-effective transducer covers are bulk packaged in protective light-sensitive bags for extended shelf life. Economically priced as low as 19 cents per cover, the covers provide protection against cross-contamination. Color elastic bands not included, but are sold separately.

REF. #	Product Description	Qty.
610-249	Non-sterile 3.5 x 20cm (1.4" x 7.9") rolled latex cover	100
610-262	Non-sterile 3.5 x 20cm (1.4" x 7.9") rolled latex cover	500
610-690	Non-sterile latex bands, .8cm (.31"), small, green	500
610-691	Non-sterile latex bands, .8cm (.31"), small, green	10,000

ENDOCAVITY FUME-FREE SOAKING SYSTEM

This fume hood is available for mounting to any wall or can be made for countertop use by adding a stand. A rack with disinfecting cups keeps the transducers in proper position, protecting the lens of the transducer. A cap on top of the holder reduces evaporation. The containers are 12 inches and will accommodate most transducers. This soaking systems eliminates fumes from glutaraldehyde and Cidex OPA, meeting OSHA and JCAHO requirements. Contact PCI Medical at 800-862-3394 for replacement filters and countertop conversion stand. Use product reference number F14 for reorder of filters. Dimensions: 22.25" x 15" x 10.25"

REF. #	Product Description	Qty.
610-720	Soaking station for two endocavity transducers, 110/60Hz (Ref. # G14KA)	1

Note: Product available in the U.S. only

SOAKING SYSTEM FOR ENDOCAVITY TRANSDUCERS

This newly designed lightweight soaking cup provides a safe and efficient soaking system for transvaginal and transrectal ultrasound transducers. This product now offers a larger blue funnel for use with larger style endocavity transducers. The soaking cup kit includes a 12" x 5" high-density polyethylene cup, lid, mounting hardware and contoured funnels for smaller transducers with a width of 2.2cm (.88") and a new funnel for larger transducers with a width of 2.7cm (1.08"). The larger funnel is now colored blue for easy identification. The contoured funnel prevents transducers from hitting the bottom of the cup, saving costly damage to the lens of the transducer. The soaking cup holds up to 120 fluid ounces of disinfecting liquid and will accommodate two endocavity transducers measuring up to 22.9cm (9") in length. When not in use, the lid is provided to prevent unpleasant fumes and evaporation of disinfectant or sterilizing solutions. The cup is recommended for use with glutaraldehyde cold chemical disinfecting/sterilizing solutions, including the Cidex® and MetriCide® families of disinfecting solutions. It is recommended the cup, lid and funnels are replaced when the disinfectant expires. Replacement cups, lids and funnels are sold separately.

LATEX-FREE CIV-FLEX™ TEE COVERS & BITE BLOCKS

NEW! IMPROVED PRODUCT • This latex-free transesophageal echocardiography (TEE) cover features a custom tapered design to provide a tighter fit to TEE transducers. The new improved cover provides a defense against cross-contamination, while protecting the transducer. The form-fitting cover is pre loaded on the applicator for ease of application to TEE transducers. Bite blocks provide a safe passage through the patient's mouth. Select kits include bite block and gel-filled syringe.

REF. #	Product Description	Qty.
610-979	Non-sterile latex-free E-Z Guard™ pediatric bite block with strap	24
610-160	Non-sterile latex-free E-Z Guard™ adult bite blocks without strap	24

FOAM TIP PROTECTOR

These single-use cylindrical foam protectors fit over the distal tip of laparoscopic and pediatric transesophageal transducers to protect the transducer from damage during storage and transportation between patients.

REF. #	Product Description	Qty.
610-748	Non-sterile foam tip guards	24

TEE TIP PROTECTOR

These TEE tip guards protect transducers from damage during storage and transportation between patients.

REF. #	Product Description	Qty.
610-945	Non-sterile TEE tip guards	24

TEE TRANSDUCER HOLDER FOR THE OPERATING ROOM

This sturdy aluminum probe holder is specifically designed for use in the operating room and is compatible with most TEE probes. The probe holder provides a convenient way to securely hold the control handle of your probe during transesophageal echocardiography procedures. The probe holder comes with a mounting clamp that attaches to a standard IV pole. To scan, simply remove the probe from the holder, manipulate the control knobs, scan and replace. The probe holder can be disinfected or sterilized by ethylene oxide, autoclave or MetriCide® and Cidex® cold chemical soaking.

REF. #	Product Description	Qty.
610-729	TEE probe holder for the OR	1

Visit www.civco.com for photos, pricing and product spec sheets.

TEE Probe Storage Rack

The TEE transducer storage rack provides a convenient and safe storage location. The unit secures the TEE probe via a custom designed 48" tube slotted on the front of the rack for ease of transducer insertion. A curved strain-relief prevents the transducer cable from damage. A padded holder provides additional protection for the transducer connector. Properly storing your transducer provides added protection from physical damage and impact with other objects. This transducer rack supports a single probe. Wall mounting hardware is included in shipment. For proper height, storage rack is required to be positioned 64" from floor level.

REF. #	Product Description	Qty.
610-1046	NEW • TEE transducer storage rack (Ref. # AC-TCRK)	1

TEE PROBE DISINFECTION & STORAGE SYSTEM

Constructed of sturdy PVC, this modular storage system holds two transesophageal probes with either one or two connectors. The wall support holds any combination of storage or disinfection containers. The storage container securely stores and protects probes from physical damage. An open-bottom transparent compartment allows the probe to dry thoroughly and permits visual inspection of the probe. The disinfection container is convenient for soaking processes. Compatible with Cidex®, MetriCide® and Omnicide, the container holds up to 1.4 liters of liquid. A cap reduces unpleasant fumes and evaporation. Wall support dimensions: 67 x 28 x 11cm (26.5" x 11" x 4.25")

TEE FUME-FREE SOAKING STATION

This unique curved soaking tube design makes it easy to insert and remove long TEE transducers. The heavy-duty stainless steel safety cage protects against damage to the tubes and probes. The soaking station is available with two or three tubes. One tube is used for initial rinsing in clean water. Each tube holds less than one quart of disinfectant, as compared to two gallons used in conventional soaking bowls. This amounts to savings of 45.5 gallons of disinfectant a year. This soaking system meets all OSHA and JCAHO guidelines. Contact PCI Medical at 800-862-3394 for replacement filters. Use product reference number F14 for reorder. Dimensions: 48" x 14" x 15"
