WWW.CIVCO.COM

CIVCO's Needle Guidance Systems utilize a **TWO-PART SYSTEM** consisting of a reusable biopsy bracket and a disposable snap-on needle guide. The disposable needle guides snap onto the biopsy bracket, providing a fixed path for visualizing ultrasound-guided instrument placement procedures. Applications include tissue biopsy, fluid aspirations and catheter placement. **SINGLE-ANGLE BRACKETS** offer imaging professionals a fixed angle needle path during puncture procedures. **MULTI-ANGLE BRACKETS** offer professionals different angles for needle placement. Once the desired angle has been selected, a stainless steel pin locks the angle securely into position. The pin is removable from the bracket for easy reprocessing between patients. Brackets should be cleaned and disinfected according to your CIVCO User's Guide.

Ultra-Pro II™ Reusable Starter Kits

Each starter kit contains 5 sterile procedure kits including: needle guide, telescopically-folded CIV-Flex™ transducer cover, gel packet and colored elastic bands. U.S. Patent No. 5,941,889.
